

MATCHMAKING FOR COMPANIES

Are you in doubt of the possibilities for collaborating with a SCIENCE student on a project?

Students at SCIENCE have a range of options for collaborating with external partners:

Type of project	ECTS credits	Academic level
MSc Thesis	30, 45 or 60	MSc
BSc Project	15	BSc
Project in Practice	15 or 30	BSc or MSc
Project Outside the Course Scope	7,5 or 15	BSc or MSc

Please ask the student about their specific options for doing a project in their programme.

Duration of projects

Depending on the type of project and whether the project is carried out full-time or part-time, a student project can vary from approx. 3 –12 months. Make sure to clarify expectations on the project collaboration.

Supervision and examination

A company representative is responsible for day-to-day supervision and Q&A during the collaboration. Students always have an academic supervisor from the university, who is responsible for academic supervision and examination.

Formalities

Student, company and academic supervisor are required to sign a standard contract describing the collaboration. The student is free to enter into additional agreements with the company (e.g. NDAs), as long as these are in accordance with academic integrity.

QUESTIONS?
